

Wodonga / Albury Camera Club

Meeting Date:	08/03/2012					Competition Secretary Brian Paatsch 0260252117 <i>brianjan@draget.com.au</i>
Judge:	Jeff Rowe					
Subject:	TRANSPORT					
Colour Prints – Section 'A' (Yellow Dot)						
1	54	Sneakers	10	pts	Place	
Comments: Getting the story – good position. Contrast a little higher?						
2	1	On the Downward Flap	11	pts	Place	
Comments: Had some fun with the manipulation here!						
3	59	Past Transporting	9	pts	Place	
Comments: Would have been better with the whole of the propeller was in? Resolution is not too flash.						
4	27	The Grand Canal	13	pts	Place	1
Comments: Getting a good feel for Venice. There at the right time of the day with good light on the buildings. 3 gondolas in the foreground form a triangle which is good composition.						
5	54	Charlotte Sydney Ferry	10	pts	Place	
Comments: Position good – background buildings help to fill in the story. Main problem here is the flat lighting.						
6	1	London I Pod	10	pts	Place	
Comments: Lots of industrial action here with poles going off in all directions. Not helped by the light sky but you did not have much control.						
7	61	Wreck	12	pts	Place	2
Comments: Good position. Like the little bit of colour. Story of the car wreck sitting in the wilderness comes across						
8	43	By Water	10			
Comments: Good image of the paddle steamer – more space for the boat to move into would have helped.

Colour Prints – Section 'B' (Red Dot)

1	68	Cruising About	10	pts	Place	
Comments: Boat is colourful and the position in the frame is good.						
2	37	Take Your Pick	10	pts	Place	
Comments: Good movement – you could have given the main boat a little more space to move into on the LHS.						
3	23	Seen Better Days	12	pts	Place	M
Comments: Old rusty car is well positioned in the frame – the dark background removes any distractions. Texture of the rusty car coming over well						
4	14	True Blue Tinnie	10	pts	Place	
Comments: I have never seen a corrugated iron boat before! Position good – creek in the background adds to the story.						
5	98	Road Night Train	9	pts	Place	
Comments: Idea is OK but you need to find a better angle. All the action is in about 1/3 of the frame. The black bottom half is not doing anything for you.						
6	23	Extreme Transport	13	pts	Place	2
Comments: Really caught the moment						
7	14	Seen Better Days	10	pts	Place	
Comments: Position OK. Better light on the truck would have helped. There seems to be 2 competing images here – the stormy sky & the old truck.						
8	37	What Breeze	11	pts	Place	
Comments: Colourful – main boat positioned OK. Could you have changed position slightly so that there was more space between the 2 sailing boats? Better without the power boat.						
9	34	These Shoes were made for Walking	12	pts	Place	M
Comments: Good story						
10	97	Car Ferry on Murray	15	pts	Place	1
Comments: An excellent moody image. Ferry well positioned & the foggy morning well caught.

Monochrome Prints (*Green Dot*)

1	98	Sleeper	9	pts	Place	
Comments: Story coming across. Woman on RHS is well positioned in the frame. Need to be careful with focus.						
2	81	Motor Bike	10	pts	Place	
Comments: Good idea – image panned to get background out of focus. Bike itself needs to be more in focus – should be able to read the makers name clearly. More space for the bike to move into in front of the bike would have helped.						
3	37	Which One	8	pts	Place	
Comments: It looks like they have already chosen! The cars look a little lost in the frame here. Focus is good and the quality of the B&W image OK						
4	27	Josephine	10	pts	Place	
Comments: I like the decorated car. Position is good. Better if more people were looking at the car but you could not control that – maybe a longer telephoto lens so the car was further away from you and the people were watching the approaching car but probably other cars would have been in the way.						
5	81	Bike from the Past	10	pts	Place	
Comments: Like the idea – getting the story of the old bike, Cropped a little too tightly – leave in handle bar & seat. Could have been printed a little lighter with slightly increased contrast.						
6	26	Just One Mile Too Many	12	pts	Place	1
Comments: Caught the old wreck well. White wall well handled. Do we need the doorway?						
7	1	Resting Road Monsters	10	pts	Place	
Comments: Nice diagonal line of trucks. Good focus. Crop just a little too tight?						
8	68	Chug Chug Chugging Away	11	pts	Place	2
Comments: Train well positioned – enough space to move into. Image works well in B&W. Resolution not very good but this probably relates to the camera used.						
9	43	By Rail	11	pts	Place	
Comments: Good diagonal line in the image. Do the reflections on the side of the train help or hinder?

EDI Competition

1	12	Cumberoona	9	pts	Place	
Comments: Getting the story of the old paddle wheel. Could we have seen all the name? Looks a little overworked with the halo effect around the outline of the boat.						
2	14	She Still Shines	8	pts	Place	
Comments: Getting a view of the dashboard of this old Holden – not helped by the murky view through the rear window.						
3	32	A Dodgy Ride	10	pts	Place	
Comments: Old truck fairly well positioned in the frame – red colour helps. Less overcast day would have helped						
4	35	End of the Line	10	pts	Place	
Comments: Seems to be a photograph of a photograph. Old dray & sign are well positioned. Sepia tone works OK						
5	36	Australian Muscle	12	pts	Place	M
Comments: Good motor action image. Car is well positioned on the corner. Background is a little distracting.						
6	36	Determination	10	pts	Place	
Comments: Bike is caught at the right point on the corner – reasonably sharp. In this case the bike is a little lost in the frame – it would have been possible to crop in a lot and make the bike more dominant & remove some of the distracting background.						
7	86	Seen Better Days	9	pts	Place	
Comments: Old rusty cars can make good images but you have to be careful with the light & the background. Here the light sky & the busy background are distracting – could we have moved around to a better angle?						
8	92	Deadly Treadly	10	pts	Place	
Comments: Monochrome works OK - the background tree on the LHS is a little distracting – could you have changed position to remove it from view?						
9	95	Constitution Dock	13	pts	Place	2
Comments: Very good reflection image that fills the frame. Often in this sort of image by concentrating on the reflection you can get rid of the clutter & un-necessary people.						
10	98	Old Days	9	pts	Place	
Comments: Filled the frame with the old dray. Front lighting would have been better.						
11	12	One Horse Power	10	pts	Place	
Comments: Getting the story of the old horse drawn tram in Victor Harbor – good position in frame – perhaps a little overexposed.						
12	27	Which One For Me?	11	pts	Place	
Comments: Like the line of bikes. Could you have changed position slightly to make the line of bikes more a diagonal & eliminate some of the background – the P sign is distracting. Would have been better if the people at the end of the bikes were not there – people in images like this one should be doing something appropriate to the image like taking a bike out of the line.						
13	35	The Last Mail Truck	10	pts	Place	
Comments: Getting the story OK						

Wodonga / Albury Camera Club

EDI Competition Continued

14	43	By Air	11	pts	Place	
Comments: Caught the old plane (DC 3?) well – plane is well positioned. You could have cropped in a little to make the plane even more dominant & remove the cloud from the bottom RH corner						
15	68	End of an Era	9	pts	Place	
Comments: Old rail car is OK. Watch position – the burnt-out sky behind the train is very distracting.						
16	86	Wheelie	11	pts	Place	
Comments: Very good position in the frame – like the diagonal. Better light would have helped						
17	92	Under Wraps	9	pts	Place	
Comments: Monochrome image of this car OK. Do we need the cover? Could you have removed it? – it would have been much better						
18	95	Scooter	13	pts	Place	M
Comments: Very good action image. The colourful stationary scooter on the LHS is balanced by the moving scooters.						
19	61	Footsore	14	pts	Place	1
Comments: Good image – good detail – good position – better with all the big toe in						
20	81	Spirit of Tasmania	10	pts	Place	
Comments: Position of boat is OK but watch the horizon particularly in water images – dramatically sloping here
