A beautiful Waratah in full bloom. You have the flower on the top left rule of	thirds which is a great composition		
tool. Two things to be mindful of, where have you focused? The very top o			
of the flower which are closer to us are not. Watch for distractions, the lig	hter coloured flower at the bottom		
left is a taking my eye away from the main subject.

The angle you have chosen really shows off the flower, all those stamens	add great character. Your lighting		
is very even, maybe a bit too even, adding some extra light from either si

Stunning blooms, 3 is a great number for composition. The fern at the bot			
the main flower, well composed. The front rose is very sharp. The table

careful with the colour re, it's very easy to overdo the saturation or vibranc	e just making things look a little un		
natural. 6 125 Play Boy	2 pts Place Merit		
Good composition, the heart of the flower is beautifully sharp, not sure what white highlights on the leaves are distracting, a polarising filter would have

This is beautiful. The main flower is lovely and sharp, perfect exposure

Good use of the lovely morning light. Gives all the buds a beautiful golde	en glow. The top right-hand corner

This tree has great character. Well worth a shot, but to do it justice we need	•		
we can get rid of any distractions, (the large building on the bottom right a

yourself, what the best angle, what's the best time of day.

Beautiful colours, This is an interesting composition, we have 3 main f	lowers	which	is a goo	d number, they			
are cropped fairly tight which cuts off the top and bottom of the flowers	which o	an be	very effe	ective, definitely			
worth a try. The backgrounds good, I'm just struggling to find enough of sharp focus, my eyes keep wandering							
around looking for something to lock onto.

A really good attempt to highlight the flower, well exposed and great focus, "The background" not sure if it was
